

Amendments to the Claims

Please enter the following amendments to Claims 1, 17, 18, 19, 21, 22, 24, and 25. The following listing of claims replaces all prior versions and listings of claims in the present invention.

1. (Currently Amended) A method implemented ~~at least partially~~ [[in]] by a programmed computer for transfer of employee stock options, the method comprising:
 - using the programmed computer to automatically provide a plurality of option value prices;
 - ~~using the programmed computer to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;~~
 - using the programmed computer to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option from an employee holding the employee stock option to an issuer of the employee stock option ~~corresponding to the particular one of the plurality of option value prices~~ without exercising the employee stock option;
 - using the programmed computer to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;
 - using the programmed computer to automatically provide a value to the employee corresponding to the particular one of the plurality of option value prices in exchange for the transfer of ownership of ~~receiving~~ the employee stock option from the employee;
 - using the programmed computer to automatically amend the employee stock option without exercising the employee stock option to allow for transfer of the employee stock option to a third party;

using the programmed computer to automatically transfer the amended stock option to
[[a]] the third party without exercising the amended stock option; and

using the programmed computer to automatically receive a value from the third party
corresponding to the amended stock option in exchange for transferring the amended stock
option to the third party.

2. (Original) A method according to claim 1, wherein providing a plurality of option
value prices uses an option pricing formula.

3. (Original) A method according to claim 2, wherein the option pricing formula is
selected from the group consisting of Black-Scholes, binomial and trinomial methods.

4. (Original) A method according to claim 1, wherein providing a plurality of option
value prices provides the plurality of prices in an option-price grid.

5. (Original) A method according to claim 1, wherein determining a stock trading price
further comprises determining an average stock trading price over a predetermined period of
time.

6. (Original) A method according to claim 1, wherein providing a value further
comprises:

providing a first value to an employee; and

providing a second value to the employee, wherein the first and second values are
provided at different times.

7. (Original) A method according to claim 6, further comprising:

determining an investment value corresponding to the second value; and

providing the investment value to the employee with the second value.

8. (Original) A method according to claim 1, wherein amending the employee stock option comprises:

amending the maturity;

amending the number of shares per option;

amending the dilution protection; or

amending the dividend protection.

9. (Original) A method according to claim 1, further comprising registering an offering of securities underlying the employee stock option.

10. (Previously Presented) A method according to claim 1, further comprising issuing the employee stock option.

11. (Previously Presented) A method according to claim 1, further comprising hedging the amended stock option.

12. (Original) A method according to claim 11, wherein hedging the amended stock option includes short selling of securities and/or futures contracts.

13. (Original) A method according to claim 11, wherein hedging the amended stock option includes buying and selling securities that underlie the amended stock option.

14. (Previously Presented) A method according to claim 11, wherein hedging the employee stock option includes buying and selling of securities that underlie the employee stock option to rebalance the hedge position.

15. (Previously Presented) A method according to claim 1, wherein an issuer of the employee stock option receives the employee stock option and provides the value.

16. (Previously Presented) A method according to claim 1, wherein an issuer of the employee stock option amends the employee stock option, transfers the amended stock option and receives the value.

17. (Currently Amended) A method implemented ~~at least partially in~~ by a programmed computer for transfer of employee stock options, the method comprising:

using the programmed computer and an option pricing formula to automatically provide a plurality of option value prices arranged in an option-price grid;

~~using the programmed computer to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;~~

using the programmed computer to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option from an employee holding the employee stock option to an issuer of the employee stock option without exercise of the employee stock option; ~~the employee stock option corresponding to the particular one of the plurality of option value prices;~~

using the programmed computer to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;

in exchange for ~~receiving~~ the transfer of ownership of the employee stock option, using the programmed computer to automatically provide a first value, a second value and an investment value to the employee, the first and second values corresponding to the particular one of the plurality of option value prices, the first value provided to the employee at a first time, the second value and the investment value provided to the employee at a second time;

using the programmed computer to automatically amend the employee stock option to modify:

- terms of the maturity;
- terms of the number of shares per option;
- terms of the dilution protection; or
- terms of the dividend protection;

using the programmed computer to automatically transfer the amended stock option to a third party without exercising the amended stock option; and

using the programmed computer to automatically receive a value from the third party in exchange for transfer of the amended stock option.

18. (Currently Amended) A system implemented ~~at least partially in~~ by a programmed computer for transfer of employee stock options, the system comprising:

- means for automatically providing a plurality of option value prices;
- ~~means for automatically determining a stock trading price corresponding to a particular one of the plurality of option value prices;~~
- means for automatically ~~receiving~~ facilitating transfer of ownership of an employee stock option from an employee holding the employee stock option to an issuer of the employee stock

~~option corresponding to the particular one of the plurality of option value prices~~ without exercising the employee stock option;

means for automatically determining a stock trading price corresponding to a particular one of the plurality of option value prices;

means for automatically providing a value to the employee corresponding to the particular one of the plurality of option value prices in exchange for the transfer of ownership of ~~receiving~~ the employee stock option;

means for automatically amending the employee stock option without exercising the employee stock option to allow for transfer of the employee stock option to a third party;

means for automatically transferring the amended stock option to ~~[[a]]~~ the third party;
and

means for automatically receiving a value corresponding to the amended stock option in exchange for transferring the amended stock option.

19. (Currently Amended) A system implemented ~~at least partially in~~ by a programmed computer for transfer of employee stock options, the system comprising:

means for automatically providing a plurality of option value prices arranged in an option-price grid using an option pricing formula;

~~means for automatically determining an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;~~

means for automatically ~~receiving~~ facilitating transfer of ownership of an employee stock option from an employee holding the employee stock option to an issuer of the employee stock

option without exercise of the employee stock option, ~~the employee stock option corresponding to the particular one of the plurality of option value prices;~~

means for automatically determining an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;

means for automatically providing a first value, a second value and an investment value to the employee in exchange for ~~receiving~~ facilitating transfer of ownership of the employee stock option, the first and second values corresponding to the particular one of the plurality of option value prices, the first value provided to the employee at a first time, the second value and the investment value provided to the employee at a second time;

means for automatically amending the employee stock option to modify:

terms of the maturity;

terms of the number of shares per option;

terms of the dilution protection; or

terms of the dividend protection;

means for automatically transferring the amended stock option to a third party; and

means for receiving a value from the third party in exchange for transfer of the amended stock option to the third party.

20. (Cancelled).

21. (Currently Amended) A computer-readable medium having computer executable software code stored thereon, the code for transfer of employee stock options, the code comprising:

code to automatically provide a plurality of option value prices;

~~code to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;~~

code to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option from an employee holding the employee stock option ~~corresponding to the particular one of the plurality of option value prices~~ without exercising the employee stock option;

code to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;

code to automatically provide a value to the employee corresponding to the particular one of the plurality of option value prices in exchange for ~~receiving~~ the transfer of ownership of the employee stock option from the employee;

code to automatically amend the employee stock option;

code to automatically transfer the amended stock option to a third party; and

code to automatically receive a value from the third party corresponding to the amended stock option in exchange for transferring the amended stock option to the third party.

22. (Currently Amended) A programmed computer for transfer of employee stock options, comprising:

a memory having at least one region for storing computer executable program code; and

a processor for executing the program code stored in the memory, wherein the program code comprises:

code to automatically provide a plurality of option value prices;

~~code to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;~~

code to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option from an employee holding the employee stock option ~~corresponding to the particular one of the plurality of option value prices~~ without exercising the employee stock option;

code to automatically determine a stock trading price corresponding to a particular one of the plurality of option value prices;

code to automatically provide a value corresponding to the particular one of the plurality of option value prices in exchange for ~~receiving~~ the transfer of ownership of the employee stock option from the employee;

code to automatically amend the employee stock option;

code to transfer the amended stock option to a third party; and

code to automatically receive a value from the third party corresponding to the amended stock option in exchange for transferring the amended stock option to the third party.

23. (Cancelled).

24. (Currently Amended) A computer-readable medium having computer executable software code stored thereon, the code for transfer of employee stock options, the code comprising:

code to automatically provide a plurality of option value prices arranged in an option-price grid using an option pricing formula;

~~code to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;~~

code to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option without exercise of the employee stock option, ~~the employee stock option corresponding to the particular one of the plurality of option value prices;~~

code to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;

code to automatically provide a first value, a second value and an investment value to the employee in exchange for ~~receiving~~ the transfer of ownership of the employee stock option, the first and second values corresponding to the particular one of the plurality of option value prices, the first value provided to the employee at a first time, the second value and the investment value provided to the employee at a second time;

code to automatically amend the employee stock option, without exercise, to modify:

terms of the maturity;

terms of the number of shares per option;

terms of the dilution protection; or

terms of the dividend protection;

code to automatically transfer the amended stock option to a third party without exercising the amended stock option; and

code to automatically receive a value from the third party in exchange for transfer of the amended stock option to the third party.

25. (Currently Amended) A programmed computer for transfer of employee stock options, comprising:

a memory having at least one region for storing computer executable program code; and

a processor for executing the program code stored in the memory, wherein the program code comprises:

code to automatically provide a plurality of option value prices arranged in an option-price grid using an option pricing formula;

~~code to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;~~

code to automatically ~~receive~~ facilitate transfer of ownership of an employee stock option from an employee holding the employee stock option without exercise of the employee stock option, ~~the employee stock option corresponding to the particular one of the plurality of option value prices;~~

code to automatically determine an average stock trading price over a predetermined period of time, the average stock trading price corresponding to a particular one of the plurality of option value prices;

code to automatically provide a first value, a second value and an investment value to the employee in exchange for the transfer of ownership of ~~receiving~~ the employee stock option, the first and second values corresponding to the particular one of the plurality of option value prices, the first value provided to the employee at a first time, the second value and the investment value provided to the employee at a second time;

code to automatically amend the employee stock option, without exercise, to modify:

terms of the maturity;

terms of the number of shares per option;

terms of the dilution protection; or

terms of the dividend protection;

code to automatically transfer the amended stock option to a third party without
exercising the amended stock option; and

code to automatically receive a value from the third party in exchange for transfer of the
amended stock option to the third party.
